

Salaman pratheep

Associate Software Engineer (2.5 Years Experience)

Tamilnadu, India | +91 8300660668 | salamonpratheep@gmail.com | LinkedIn

Professional Summary

MBA Graduate in Operations Management with 2.5 year of experience in ERP software implementation, business operations support, and backend application development. Proficient in Java, Spring Boot, RESTful APIs, SQL, MySQL, and backend system design, with experience building, maintaining, and supporting scalable server-side applications. Skilled in database management, API development, troubleshooting, and performance optimization. Strong analytical and problem-solving abilities with a focus on process improvement and operational efficiency. Seeking an entry-level Backend Developer role.

Technical Skills

Java (Core Java, OOP, Collections Framework, Streams, Multithreading)

Spring Boot, Spring MVC, Spring Data JPA, Spring Security

RESTful APIs, Microservices Architecture, API Development & Integration

Hibernate, JPA, MySQL, PostgreSQL, Database Design & Query Optimization

Maven, Gradle, Git, GitHub, Postman, IntelliJ IDEA, VS Code

Experience

Huewine Software Private Limited

Jan 2024 – Jun 2026

Java Developer

Nagercoil, India

Developed backend services for ERP operational software modules using Java and Spring Boot, helping transition business processes from manual records and legacy tools to a centralized ERP system.

Designed and implemented RESTful APIs for seamless communication between frontend and backend systems. Built scalable business logic and integrated MySQL databases using Spring Data JPA and Hibernate. Implemented authentication, validation, and exception handling to ensure secure and reliable application performance. Optimized database queries and API response times, enabling efficient data processing and real-time operational updates.

Huewine Software Private Limited – Internship

Jan 2024 – Jun 2024

Java Developer

Nagercoil, India

Worked as a Java Backend Developer Intern, gaining hands-on experience with Java, Spring Boot, and MySQL. Assisted in developing RESTful APIs, implementing backend business logic, and performing database operations using JPA/Hibernate. Collaborated with the development team to debug issues, test application functionality, and learn software development best practices.

Education

Master of Business Administration - (Operations Management)

2021 – 2023

Maria College of Engineering and Technology

Bachelor of Engineering (Mechanical Engineering)

2017 – 2021

Bethlehem college of engineering and technology

Additional Information
